*1 The generation capacity for solar power plants is based upon the maximum output of each solar power plant's modules, and the generation capacity for biomass power plants is based upon the gross capacity. Both list generation capacity at month end.

*2 The planned electricity sales figures are calculated by RENOVA.

*3 Existing plants refer to those which have been in operation for at least 13 months.

*4 Outage at the biomass power plant is planned due to the scheduled annual maintenance in May 2018.

*5 A new large-scale solar power plant will begin operation in March 2019.

*6 The fixed purchase price, exclusive of consumption tax, is based upon the FIT Scheme for each power plant and may differ from the actual electricity sale price.

*7 As stated in the "Notice Regarding Change in Fiscal Year End (Last Day of Fiscal Year) and Partial Amendments to the Articles of Incorporation" released on July 5, 2018, the fiscal year end of the Company will be changed from March 31 to March 31 and the period of the fiscal year ending March 31, 2019 of the Company will accordingly be ten (10) months. However, the fiscal year end of each power generation business it is already March 31 and so will not change in this case. Therefore, the results of electric power generation output of each power generation business recorded from April 2018 to March 2019 (for twelve (12) months) will be included in the consolidated financial results of the Renova Group for the fiscal year ending March 31, 2019. Accordingly, the results of electric power generation output of each power generation business from January to March (for three (3) months) will be included in the consolidated financial results of the fourth quarter of the fiscal year ending March 31, 2019 (the period of which is only the one (1) month of March).

*8 Expected output curtailment at the Kokonoe Solar power plant is incorporated into its full year performance forecasts.

*9 The capacity of Nasu-Shiobara Solar TK increased from 24.8 MW to 26.2 MW after added panels came into operation in April 2018.

*10 RENOVA has invested in URE through Sensyu Holdings Co., Ltd., a subsidiary of RENOVA. Assuming that RENOVA directly owns URE's shares, RENOVA's substantial interests, calculated by multiplying URE's shares owned by Sensyu Holdings by RENOVA's equity in Sensyu Holdings, are 35.3%.

*11 The purchase price for wood biomass derived from thinned wood is 32 yen whereas that for general wood biomass is 24 yen.
